

QLAR4K AUTOMOTIVE BODY ROTISSERIE

PRODUCT DESCRIPTION

- Support up to 4,000 lb for automotive body and chassis restoration. Full 360-degree rotation provides access to surfaces that are difficult to reach.
- Two hand-operated hydraulic jacks adjust the working height. Secure the mechanical height and rotation locks before starting work.
- The telescoping frame adjusts from 89.1 to 228.5 inches between mounting ends. Sliding mounting arms accommodate suitable structural attachment points.
- Hand-cranked gearbox rotation provides controlled positioning. Balance the supported body around the rotation axis before turning.
- Four large locking casters, two center casters and adjustable stabilizer feet support shop positioning on a suitable level surface.
- Gray and black powder-coated steel construction. Automatic two-year warranty on non-wearable parts, free local delivery within 25 miles of Gilbert and nationwide shipping.

QLAR4K AUTOMOTIVE BODY ROTISSERIE

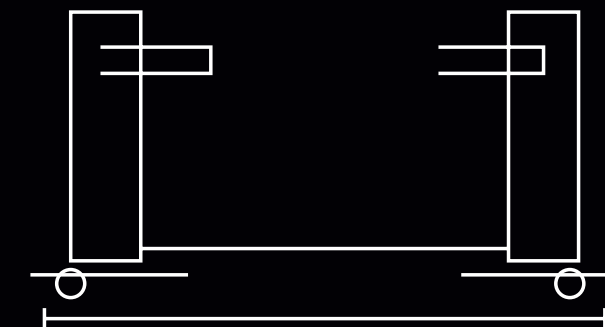

Technical parameters

Model	QLAR4K
Total capacity	4,000 lb
Rotation	360 degrees
Overall length	127.3-266.7 in.
Mounting length	89.1-228.5 in.
Mounting height	22.6-48.6 in.
Upright height	53.1-79.1 in.
Base width	80.7 in.
Mounting-arm span	14.5-38.1 in.
Lift system	Dual hydraulic jacks
Rotation control	Hand-cranked gearbox
Main casters	Four 8 in. locking
Center casters	Two 3 in.
Warranty	2 years, non-wearable

OVERALL LENGTH: 127.3-266.7"

MOUNTING LENGTH: 89.1-228.5"

BASE WIDTH: 80.7"

Dimensions shown in inches. Marketing dimensions are rounded.
