PARKING LIFT SERIES

QL4P9KXL-LUXE

PARKING LIFT SERIES

PRODUCT DESCRIPTION

- A versatile parking lift for cars, trucks, SUVs, and more, within its 9,000 lb capacity and platform dimensions. Raises vehicles up to 86-5/8 inches for elevated parking and storage.
- A compact layout makes installation straightforward. The caster kit lets you reposition the entire lift when unloaded, giving you more flexibility in your garage.
- Mechanical safety locks and a separate cable-break protection system provide two layers of protection while a vehicle is raised.
- High-density slide blocks guide movement inside the columns and are built for long service life.
- A hydraulic burst-protection valve helps prevent the lift from dropping rapidly if a hydraulic line ruptures.
- One-piece, high-strength diamond-plate runways provide a durable, slip-resistant surface for vehicle tires.
- Wheel stops help keep the vehicle in position and prevent it from rolling off the runways.
- Add an optional rolling jack to raise the wheels off the runways for easier access during vehicle maintenance.

PARKING LIFT SERIES

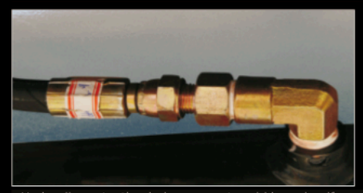

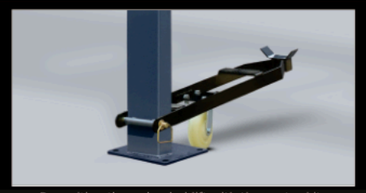

Technical parameters

Model	QL4P9KXL-LUXE
Capacity	9,000 lb
Max. lift height	86.625 in.
Clearance on top lock	81 in.
Overall height	97.5 in.
Width without motor	106.75 in.
Width with motor	117.75 in.
Length with ramps	226.75 in.
Length without ramps	194.5 in.
Drive-through on lift	85 1/16 in.
Between columns below	98 1/16 in.
Runway length / width	185 / 20 in.
Clear runway spacing	38 in.
Lift time / power	70 sec / 110V
Gross shipping weight	1,951 lb
Packing L x W x H	189 x 22.4375 x 28.5625 in.

Detail

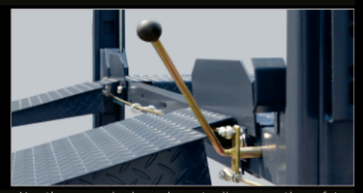

Hydraulic protection helps prevent rapid lowering if a line ruptures.

Reposition the unloaded lift with the caster kit.

Multiple pulleys route the lifting cables beneath the runways.

Yellow ramp strips highlight the edges and help protect against wear.

A separate safety mechanism engages if a lifting cable breaks.

Use the manual release lever to disengage the safety locks for lowering.
