

SINGLE POST LIFT SERIES

QL1P5.5K MOBILE SINGLE POST LIFT

PRODUCT DESCRIPTION

- The QL1P5.5K lifts compatible vehicles up to 5,500 lb for indoor inspection, maintenance and repairs. Its single-column design leaves the opposite side of the vehicle accessible.
- The mobile base and steering handle let you reposition the unloaded lift. Retract the transport wheel and set the base firmly on a suitable level floor before raising a vehicle.
- Adjustable front and rear arms and four threaded rubber pads help align the lift with the vehicle manufacturer's designated lifting points.
- A hydraulic cylinder raises the arm assembly. The manual mechanical safety lock supports the raised vehicle during service. Always lower the lift onto the lock before working underneath.
- The 1 HP, 110V single-phase power unit is prewired with a three-prong plug. Connect it to a suitable grounded receptacle and keep the controls within clear view of the vehicle.
- This mobile lift is intended for vehicle service, not storage. All non-wearable parts include an automatic two-year warranty, with no registration required.

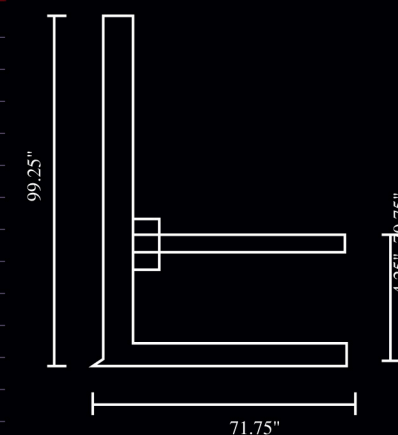

QL1P5.5K MOBILE SINGLE POST LIFT

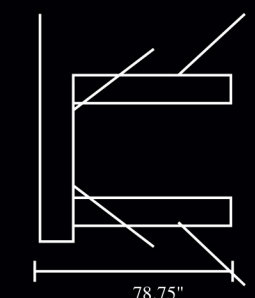

Technical parameters

Model	QL1P5.5K
Lifting capacity	5,500 lb
Maximum lifting height	70.75 in.
Minimum pad height	4.25 in.
Overall column height	99.25 in.
Base length, side reference	71.75 in.
Length, plan reference	78.75 in.
Base width	47.25 in.
Rear arm adjustment	19.75–27 in.
Front arm adjustment	24.75–37.25 in.
Safety release	Manual
Motor	1 HP
Electrical supply	110V, single-phase
Plug	Prewired, three-prong
